

Powerful e-invoicing and payments capabilities embedded right within your ERP

Accept and process payments securely across retail and accounts receivable channels directly in Sage Intacct with Versapay's ERP payments solution. Drive efficiency and cash flow and say goodbye to fragmented systems and stale data with all your payments operations now in one place.

Streamline invoicing & increase efficiency

- Collect payments directly in Intacct and make it part of your native ERP workflows, limiting the need for training.
- Auto-reconciliation from acceptance, to posting to cash receipt journal balancing.
- Research is easy with all payment data in your ERP.

Improve cash conversion & lower processing costs

- Accept and process payments across all sales channels—retail, and the back office.
- Accept credit cards and ACH payments
- Minimize fees with Interchange Optimization and Level II and III processing.*

Reduce risk & avoid payments fraud

- Securely process online orders from cart to cash.
- Tokenized and encrypted sensitive credit card data.
- Transactions are retained for future or repeated authorization and settlement.
- 24x7 access to online portals for all payment processing data, reporting tools, and dispute management. PCI validation protects you, your customers and helps reduce fraudulent chargebacks.

* Minimum transaction data levels required to qualify for Level II and Level II processing, you must meet the minimum transaction levels

Sage Recommended Solution

Outcomes achieved by Versapay clients

50%
reduction in manual work

30%
decrease in past-due invoices

25%
increase in payment speed

“[Versapay] not only helped us save in processing fees by providing level 3 data, but it also eliminated our manual data entry in A/R by more than 70%, resulting in even more savings. It's a win-win situation for us, greater cost savings, less data entry and errors, and faster closing.”

Luis Guerra, Accounting Manager,
Magaya Corporation
